DETAILED ACTION

This office action is in response to applicant's amendment filed on 10/20/04.

Claim 1 has been amended. Claims 23 – 31 have been added. Claims 1, 23 – 31 are pending on this application.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,624,761.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the claims having similar subject matter of analyzing the types of input data; wherein the input data having plurality of disparate type; and performing content dependent data compression or data compression if the data type of input data is identified or not identify respectively.

3. Claim 23, 24, and 25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 4 of U.S. Patent

Art Unit: 2819

No. 6,624,761 (Col. 27 lines 15 – 19). Although the conflicting claims are not identical, they are not patentably distinct from each other because both the claims having similar subject matter of appending a data compression type descriptor to the output encoded or compressed data.

4. Claim 26 – 29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 12 of U.S. Patent No. 6,624,761. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of claim 26 - 29 are similar subject matter in invention 12, which pointed to analyzing input data stream; selecting compression method which providing highest compression ratio according to analyzed data from input data stream; appending a data compression type descriptor to the output encoded or compressed data.

Claim 30 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 13 of U.S. Patent No. 6,624,761. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of claim 30 are similar subject matter in invention 13, which pointed to analyzing input data stream; if the data type of the data block is identified, performing content dependent data compression; comparing a content dependent data compression ratio of the compressed data block against a first threshold; appending a data compression type descriptor to the compressed data block; outputting the compressed data block and appended data compression type descriptor, if the content data compression ratio is above the first threshold; and performing data

compression on the data block with a single data compression encoder, if the content dependent data compression ratio is not meet the first threshold.

Allowable Subject Matter

5. Claim 31 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
